

TEST IN CH1010

There is one test which is worth 22% of your overall CH1010 grade.

The first part of the test is multi-choice and covers general concepts up to the end of week 1.

This component is worth around 33% of the test.

The second part of the test involves short answer questions and is worth around 67% of the test grade.

Material covered in the test in the short answer sections will not be covered in the short answer section of the final exam. (N.B. it may be covered in the multi-choice section of the final exam.)

CH1010

Test 1

11 / 12 / 2006

During the tutorial session on Monday morning (10-11am).

The following subject areas will be examined in detail only in this test :

hydrogen bonding, acids and bases, determining molecular structures from analytical and spectroscopic data, terpene/alkaloid/steroid structures, monosaccharides, nucleotides (A-T).
